

Powered by **provakil**

Litigation Management Software

A Legal Workspace specifically built for **The Government Bodies**

Key Challenges

⊗ **Visibility Over Multiple Court Updates**

Tracking multiple court updates and managing large volume of data manually

⊗ **Centralized Access To Data**

Uncovering data stored across the department to generate timely reports and make decisions

⊗ **External Counsel & Legal Spend Management**

Managing legal processes and ensuring compliance-readiness with court orders

Challenge 1: Lack of Visibility

**Manual review of 70,000+ causelists
across multiple court websites**

**Manual tracking of thousands of ongoing
cases**

**More no. of ex-parte orders due to lack
of information on new cases filed**

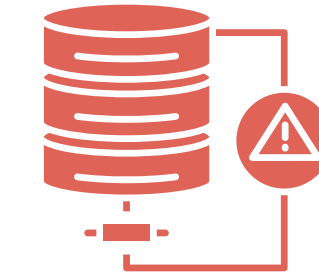

**Lawyers are not updated with their daily
workloads**

Challenge 2 : Data Management & Reporting

Redundant tasks due to non-centralized critical case data

Data loss risk due to information being stored in disparate systems

Generating reliable reports on ongoing case & potential liability

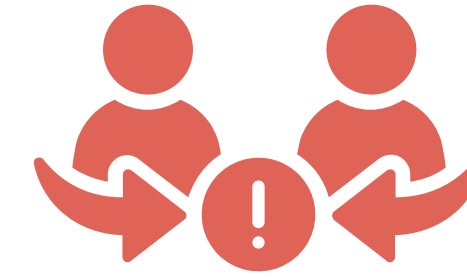

High dependency on external lawyers for data collection

Challenge 3 : Compliance & Workflow Management

Assign, manage, and track cases for different legal team members

Team collaboration for collecting case-related data

Managing compliance manually for high volume of cases

Manage external counsel onboarding, communication, & payments

How Provakil's Litigation Management System helps?

Centralized Data Repository

- Consolidate all case information like hearing dates, orders, and judgements in a single, easy-to-use platform
- Retrieve case information quickly to analyze and collaborate efficiently with your team

Auto Case Updates

- Automate the data collection from multiple sources to ensure real-time, accurate data at your fingertips
- Free up the legal team's time with automated notifications on case updates.

The screenshot displays the Provakil Litigation Management System interface. The browser address bar shows `provakil.com/cases`. The dashboard includes a sidebar with navigation options: Cases, Contract Management, Notice Management, Reports, SARFAESI Management, Arbitration, Acts (4), External Counsel, Case Actions, Spends, and Notes. The main content area features a '+ New Case' button, a search bar, and a filter dropdown. Below these are five summary cards: Total Cases (67), Pending Cases (36), Disposed Cases (21), Custom Cases (10), and Status Unavailable (0). A table of cases is shown, with two rows highlighted. The first row is for 'Mrs. Mauli Prमित Shah vs Aditya Birla Finance Ltd.' with details: Case Number: 2000534JM, Court Jurisdiction (State): Maharashtra, Date of Filing: 22 November, 2022, Case Type: Indirect Tax Matters, Court Jurisdiction (District): Beed, Date of Disposal: 30 December, 2022, Lawyer: Arjun Y., Region: Latur. The second row is for 'Veda Research Laboratories vs Survi Projects' with details: Case Number: 1500534BF, Court Jurisdiction (State): Punjab, Date of Filing: 12 August, 2022, Case Type: Civil, Court Jurisdiction (District): Amritsar, Date of Disposal: 24 August, 2022. A callout box for the first case shows 'Next Hearing: November 24, 2022' and 'Court: 1' with a bench of Justice Ramalingam, Sudhakar J., and Sh. Avinash K.

Streamlined Workflow

- Automate manual, time-consuming, and error-prone tasks to increase your team's efficiency
- Assign and manage work between legal managers and lawyers through a standardized process to mitigate compliance risks

Efficient Case Tracking

- Enable stakeholders to have real-time visibility into the status & progress of each case
- Maintain a comprehensive audit trail to track activities, ensuring transparency and mitigating risks

Empanelled Counsel Management

- Centralize information sharing and performance tracking to promote transparency and accountability
- Enhance efficiency in engaging and communicating with empanelled counsel

Advanced Analytics and Reporting

- Leverage data analytics to gain valuable insights into case trends, resource allocation, and performance metrics
- Generate customized reports and visualizations for informed decision-making

Tailored User Management

Flexible User Creation:

- Create an unlimited number of users within the system.
- Streamline onboarding and user provisioning processes.
- Assign unique credentials and access levels for enhanced security.

Role-Based Access Control (RBAC):

- Granular permission management based on user roles.
- Control access to specific features, data, and functionalities.
- Ensure sensitive information is accessible only to authorized personnel.

Customizable User Roles & Designations:

- Define user roles based on specific organizational needs.
- Categorize users as lawyers, paralegals, legal assistants, administrators, etc.
- Assign customized designations aligned with existing hierarchies and job functions.

Hierarchical User Management:

- Establish hierarchical structures reflecting organizational charts.
- Assign supervisory roles for efficient workflow management and oversight.
- Facilitate seamless collaboration and task delegation among teams.

Audit Trail and Activity Tracking:

- Log and track user actions for accountability and compliance.
- Monitor critical activities, such as document access, case updates, and system configurations.
- Generate comprehensive audit reports for auditing and regulatory purposes.

Litigation Management System

➤ ABOUT

The Delhi Development Authority (DDA) is an organization that's responsible for planning, developing, and constructing housing projects, commercial lands, etc., in Delhi. Before implementing Provakil's LMS, DDA had a dedicated legal team of 70 in-house law officers and 500+ empanelled counsels to handle over 3000 cases annually filed in courts across the country.

➤ CHALLENGES

- DDA had over 25000 pending litigation cases across the country, handled by an internal team of 70+ law officers across 90 internal departments
- With an overwhelming volume of fragmented case information stored in dispersed data sources, they struggled to access comprehensive information to make effective decisions

➤ SOLUTION

- Provakil implemented a robust Litigation Management System for DDA that centralized all case-related information, including case hearing details from court websites, disparate systems and documents
- This comprehensive and unified view of the cases enabled them to efficiently retrieve, analyze, and utilize data for effective decision-making

Litigation Management System

➤ ABOUT

The Securities and Exchange Board of India (SEBI) is a statutory regulatory body established by the Government of India to safeguard investor interests and regulate the securities market. Before adopting Provakil's robust Litigation Management System, SEBI had a dedicated legal team overseeing around 3000 cases without any streamlined workflow.

➤ CHALLENGES

- SEBI struggled with getting timely and accurate updates on the progress and status of their litigation cases.
- Manual tracking and monitoring of processes led to delays, inconsistencies, and possible oversights, making it difficult to remain up-to-date with the latest developments.

➤ SOLUTION

- By implementing the automatic case updates feature of Provakil's Litigation Management System, SEBI automated the tracking and retrieval of case-related updates from court websites and legal databases.
- Real-time notifications and updates on the case progress, hearing dates, judgements, and other relevant information enabled SEBI to make informed decisions and effectively manage their litigation cases.

Litigation Management System

➤ ABOUT

The Central Bank of India (CBI) is one of India's oldest and largest banks, owned by the Ministry of Finance, and plays a crucial role in the Indian financial sector. The extensive scope of the bank's activities results in a higher probability of legal disputes and an increased volume of litigation cases to handle.

➤ CHALLENGES

- Due to the scale of their operations, CBI's dedicated legal team encountered significant difficulties in managing the vast number of litigation cases filed against them
- The extensive scope of the bank's activities results in a higher probability of legal disputes and an increased volume of litigation cases to handle. Efficiently tracking and managing these cases becomes a challenging task for the legal team.

➤ SOLUTION

- CBI implemented Provakil's centralized Litigation Management System to streamline the process of handling litigation cases resulting from their extensive operations.
- With automated case management processes, efficient tracking, monitoring, and documentation of cases, the system improved the accessibility of real-time case-related information to manage a large volume of litigation cases effectively.
